a document issued in the name of

the Interim Secretary-General of the PCP.

The Secretary-General announced that the Central Committee of the Communist Party has decided to establish a workers' library allegedly for the purpose of offering classes in instruction and education to workers and students. The Secretary-General indicated that literature printed for the library would be in the form of leaflets to be passed by hand. Reportedly, everything to be printed will be approved first by the Central Committee.

The real purpose of this library and its instruction, according to the Secretary-General, is to intensify the campaign against foreign organizations, which are trying to take over Germany both politically and economically. Source stated that the idea is in response to an order issued by the Soviet Union to all peoples to intensify their campaign of peace against the war preparations of the imperialists.

4. According to source, the Secretary-General stated that, to counteract foreign propagandists who are in the pay of the North American Embassy in Asunción, the force of the people must be multiplied a hundredfold. The purpose of the workers' library, therefore, will be to instruct qualified members of the Party how to portray in clear and concise words the advance of North American imperialism towards sending Paraguayan youth to the Korean war and into war against the Soviet Union.

5. The Secretary-General made no statement as to where the library will be centered, but he stated that the documents would be issued in small educational bulletins, which will be placed at the disposition of the zone leaders and responsible members of the various groups.
